

SAFETY TESTS FOR TENTS AND MARQUEES

Nowadays, more people are aware of the quality and safety of tents and marquees. Since materials can act as a source of fire ignition when they come into contact with heat for emerging fire, manufacturers should choose the material which has less likelihood of propagating fire to secure public safety. STC offers you a wide range of testing services for tents and marquees to maintain the product quality and gain customer confidence. Tests include:

Testing Items	Test Method
Flame resistant test of camping tent - Floor material - Wall & top materials	CPAI 84
Safety and performance test of camping tent - Outer tent - Inner tent - Groundsheet - Plastic windows	ISO 5912
Flammability test for textiles used in marquees	BS 7837

More testing services are available. Please contact our staff of Textile and Material Department.
